STERLION™ SILVER ION ANTIMICROBIAL

Silver as antimicrobial protection

Silver is a natural compound that prevents the growth of unwanted microorganisms such as mold, mildew, fungus and bacteria by releasing ions on demand.

Topcoat Systems with Sterlion Antimicrobial

Sterlion antimicrobial is available in all Hawk Labs topcoat systems. Sterlion antimicrobial inhibits bacterial growth on the coated surface by preventing replication and interrupting the cell's DNA.

Siltrac technology

Detect and confirm the presence of Sterlion antimicrobial in your coated surface with Hawk's custom laser indicator with Siltrac technology. The green light confirms your coating is protected by Sterlion.

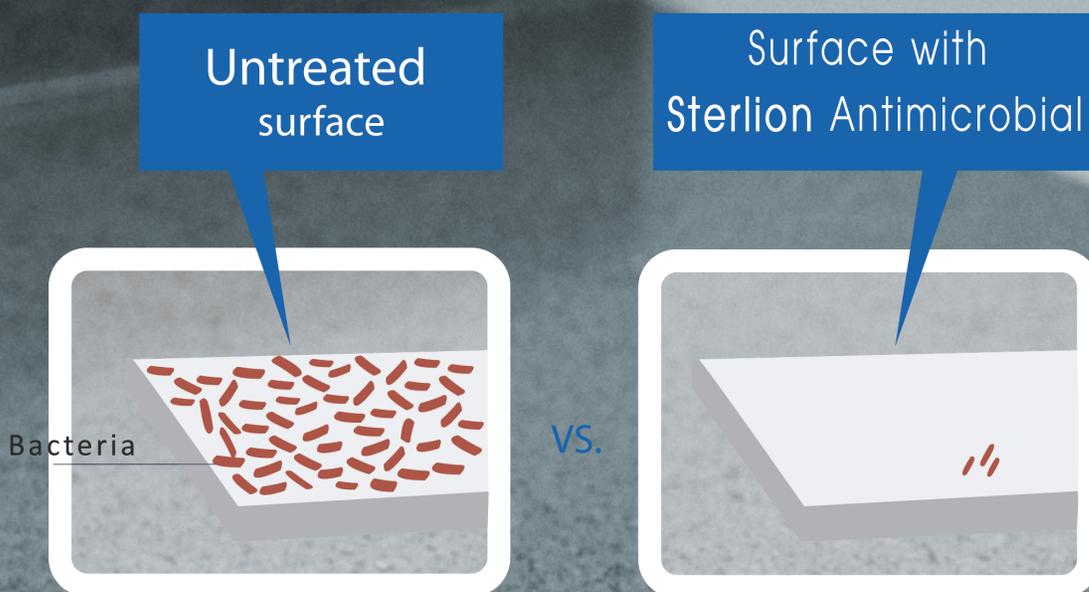

Long lasting protection

Antimicrobial protection will last the lifetime of the coating.
